ENERGY SPHERE

Work in this area is one of the main aspects that separates our company in the engineering services market by the level of experience and responsibility.

To date, we have placed more than ten alternative energy sources into service. The overall capacity of the objects exceeds 800 Megawatts.

Solar Power Plants with 100MW power capacity (SPP Kapshagay)

Wind Power Plants with 156MW power capacity (WPP Arshaly)

Solar Power Plants with 50MW power capacity (SPP Shaulder)

Solar Power Plants with 50MW power capacity (SPP Kaskelen)

Fiber-optic communication line constructions (Kyrgyzstan border)

Solar Power Plants with 20MW power capacity (SPP Kyzylasker)

220 kW of Overhead power transmission lines

Wind Power Plants with 50MW power capacity (WPP Kostanay)

Wind Power Plants with 100MW and 50MW power capacity (WPP Aktogay)

Solar Power Plants with 50MW power capacity (SPP Sholakkorgan)

Solar Power Plants with 14MW power capacity (SPP Arys)

SOCIAL INFRASTRUCTURE

People's economic performance, as well as their standard of living and quality of life, are directly affected by the development of social infrastructure. This sphere is the main and fundamental aspect of the urban environment, and it encompasses a wide range of industries that provide a pleasant living for the inhabitants.

As a result, one of our company's main areas of focus is to provide quality supervision services for the construction of socially significant urban infrastructure facilities such as gas stations, urban life support systems, bus parks and public transportation stops, hotel complexes, population recreational facilities, and medical and sports facilities and complexes.

BTA Bank building

«Bavaria, Hyundai, Rolls-Royce» Car dealerships

«Zhetysu» Hotel complex

«SEN voice music studio»
Music school

«Esentai City» Office buildings

«McDonald's» Restaurant

SOCIAL INFRASTRUCTURE

«ACE» Indoor tennis center

7 and 8 floors of JSC «Kazakhtelecom» building

«Compass» Gas stations and «Burger King» fast food cafés in Almaty and Nur-Sultan cities

«Ba Tu travel» Bus depot

«KazGASA» University

«Sokol» STC Race Track

Major road overhaul

29 Traffic lights objects

Chairlifts

125 Bus stops

Green belt around Nur-Sultan city

Gas stations

RESIDENTIAL COMPLEXES

More than 1,000,000 square meters of residential space testify to our company's active involvement in residential development. And we are only planning to expand in this direction. Our team is constantly growing to include additional highly skilled specialists, allowing us to greatly expand our coverage of construction projects.

Residential complexes are a critical component of the city system, and quality control in the construction of residential buildings and structures is extremely important to the end buyer and customer. Our company's purpose is to provide technical supervision of these categories of things in order to ensure high quality construction and timely completion of the objects for use.

INDUSTRIAL WAREHOUSE PROJECTS

Work on industrial and warehouse construction projects is another area in which our organization has excelled. Our specialists' high level of qualification in this field has demonstrated the benefits of holding first-level accreditations in project management, technical and architectural supervision.

Construction of industrial assets on the territory of the Republic of Kazakhstan is a straight path to an independent country's sustainable economy. Our company's technical supervision experts have gained great knowledge while participating in the engineering of industrial complex facilities. We didn't miss an opportunity to demonstrate our qualifications while at work, which will help us achieve greater heights in the future!

Project management of the implementation of the retail park infrastructure with an area of 204 hectares

«ABM Logistics» Administrative and warehouse building

Administrative and warehouse building for the exploitation and maintenance of warehouses

«Karina» Production building and final products warehouse

PERMITS

Certificates of accreditation for:

- ✓ Project management in architecture, urban planning and construction field;
- ✓ Implementation of engineering services for technical supervision at technically and technologically complex facilities of the first level of responsibility;
- ✓ Performance of expert work on the technical examination of the reliability and stability of buildings and structures at technically and technologically complex facilities of the first and second levels of responsibility

Certificates of compliance:

- ✓ ST RK ISO 45001-2019 «Occupational health and safety management system»;
- ✓ ST RK ISO 14001-2016 «Environmental Management System»;
- ✓ ST RK ISO 9001-2016 «Quality Management System»

Licenses:

- ✓ Construction and installation works;
- ✓ Project activities;
- ✓ Survey activities

FOREIGN PARTNERS AND CUSTOMERS

OUR ADVANTAGES

Individual requirements

Working with various customer requirements necessitates a tailored strategy to each client. In our job, we always consider the circumstances, appraise the situation constructively, and demonstrate flexibility where necessary.

Experienced Professionals

The corporate team is made up of dedicated professionals who enjoy what they do, have a wide range of skills, and a wealth of experience, allowing them to make sound decisions.

Own instrumental and technological facilities

The majority of construction technology faults can only be recognized with specialized and validated equipment. Our organization has the necessary technical resources.

Efficiency of work

The quickness with which problems are solved is also preferable, because the pace of enormous objects construction needs immediate solutions and answers.

PORTFOLIO

The portfolio's objective is to inform you on the work of «KazBuildExpert» LLP. Working with various customer requirements necessitates a tailored approach to each client. In our work, we always consider the circumstances, assess the situation constructively, and demonstrate flexibility where necessary. All of our actions are focused at long-term outcomes, because we are mostly motivated by the potential that the customer will return to us another time and will most likely refer us to their partners. Throughout its history, the organization has proven to be a reliable, promising, and responsible executor.

Today, «KazBuildExpert» LLP continues to develop and execute project management solutions in order to expand its offerings in its field of activity.
